SUMMARY

I am an Innovative Software Engineer with expertise in full-stack web and mobile development, specializing in Node.js, React.js, React Native, MongoDB, and Tailwind CSS. Proven ability to design and implement scalable, efficient web and mobile applications using modern JavaScript technologies. Skilled in creating responsive, high-performance solutions that deliver exceptional user experiences.

EDUCATION

University Name
University of Lagos(Unilag)
Computer Science

Lagos, Nigeria
2023 - present

PROFESSIONAL EXPERIENCE

Freelance Project (FASTGAK)

- **Technology Stack:** *JavaScript, React Native, Expo, Node.js, Express*
 - Built a feature-rich mobile application with a focus on seamless user experience and modern functionalities.
 - Designed and implemented authentication using Google Sign-In
 - Integrated secure and efficient payment processing with Stripe
 - Developed intuitive navigation flows using React Navigation
 - Managed complex application state with Redux Toolkit for scalability and performance
 - Implemented authentication mechanisms using `jsonwebtoken` and `bcryptjs`
 - Developed payment integration with Stripe for real-time transactions
 - Leveraged `mongoose` for database management and `nodemailer` for automated email notifications
 - Showcased proficiency in scalable backend architecture, RESTful services, and modern frontend frameworks like Next.js.
 - Link : [Eblog](#)
 - Ensured secure handling of sensitive data with `crypto-js` and environment configurations using `dotenv`

Development Tools: *Nodemon for hot-reloading during development*

Personal project

E-blog

- Developed a robust API for managing blog posts, comments, and user authentication, demonstrating expertise in backend development and RESTful API design.
- Implemented secure authentication and authorization mechanisms using modern web development practices for high performance and scalability.
- Built the E-blog repository with Next.js, leveraging TypeScript for type safety, along with CSS and JavaScript for styling and functionality.
- Created comprehensive documentation for starting the development server and deploying the app on Vercel.

Ozitech (Internship level)

- **GitHub Repository:** [Thomson-dev/prime-base](#)
- **Overview:** Designed and developed an interactive cryptocurrency investment calculator enabling users to estimate potential earnings from investments across various cryptocurrencies.
- User-friendly interface for selecting and comparing cryptocurrencies, including Bitcoin, Ethereum, Tether, and USDCoin

- Real-time calculation of potential returns based on investment amount and term length
- Fully responsive design for seamless use on both mobile and desktop devices
- **Technologies Used:**
- **Frontend:** React, JavaScript, CSS, HTML
- **Tools:** Create React App, Ant Design, React Icons
- Link : [prime base](#)

SKILLS

- **Programming Languages:** Proficient in **JavaScript, Python, Java**
- **Frontend Development:** Expertise in **React, React Native, Next.js**, and **Tailwind CSS**
- **Backend Development:** Skilled in **Node.js, Express.js**, and REST API design
- **Database Management:** Proficient in **MongoDB**, and working with relational/non-relational databases
- **State Management:** Expertise in **Redux Toolkit** and **Zustand**
- **Payment Integrations:** Knowledge of **Stripe API** for secure payment processing
- **Others:** Familiar with **Google Sign-In** integration and mobile app development with **Expo**
